## PROFESSIONAL SUMMARY

---

Data Analyst with a track record of turning messy, real-world datasets into structured insights and actionable dashboards. Currently gaining hands-on experience at Decode Labs, working across data cleaning, EDA, SQL analysis, and Power BI reporting. My project work spans retail operations, customer churn analysis, and business intelligence development, with a consistent focus on answering real business questions, not just processing data.

## TECHNICAL SKILLS

---

**Data Analysis:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Validation, Business Analysis, Data Storytelling

**Business Intelligence:** Power BI, Dashboard Development, KPI Reporting, Data Visualization

**Database:** SQL, Joins, Common Table Expressions (CTEs), Subqueries, Aggregate Functions, CASE Statements

**Microsoft Excel:** Advanced Excel, Pivot Tables, Pivot Charts, LOOKUP Functions, Conditional Formatting

**Power BI:** Power Query, Data Modelling, DAX

**Core Skills:** Problem Solving, Communication, Critical Thinking, Attention to Detail, Team Collaboration, Time Management

## PROFESSIONAL EXPERIENCE

---

### Data Analyst Intern | Decode Labs

*January 2026 – Present*

- Cleaned and prepared datasets by handling missing values, removing duplicates, standardizing text, and reformatting dates — improving data reliability across multiple business reporting functions.
- Performed exploratory data analysis (EDA) on structured datasets to surface trends, detect anomalies, and analyze variable relationships, feeding directly into reporting and stakeholder presentations.
- Wrote SQL queries to filter, join, aggregate, and extract insights from structured business data, supporting faster and more accurate reporting turnaround.
- Developed interactive Power BI dashboards and Excel reports to visualize key metrics and communicate findings clearly to both technical and non-technical stakeholders.

## PROJECTS

---

### Retail Performance, Profitability & Year-over-Year Growth Analysis

*Tools: Power BI, Power Query, DAX, Data Modelling*

- Designed and developed a three-page interactive Power BI dashboard analyzing sales, profitability, customer segments, regional performance, and product categories.
- Built a star schema data model to improve reporting efficiency and scalability.
- Developed DAX measures to calculate Total Sales, Profit Margin, Previous Year Profit, and Year-over-Year Growth.
- Conducted profitability and discount analysis, identifying opportunities to improve pricing strategy and business performance.
- Presented executive-level insights and recommendations to support strategic business decisions.

### Telco Customer Churn Analysis

*Tools: Power BI, Power Query, Microsoft Excel*

- Analyzed data for over 7,000 telecom customers to identify key drivers of customer churn.
- Cleaned and transformed customer datasets using Power Query to improve reporting accuracy.
- Built a three-page interactive dashboard visualizing churn trends, customer segments, and key performance indicators.
- Identified high-risk customer groups based on contract type, internet service, payment method, and technical support usage.

- Delivered actionable recommendations to support customer retention initiatives.

### **Retail Operations Data Cleaning & Business Analysis**

*Tools: SQL*

- Cleaned and analyzed a retail operations dataset containing over 5,000 records across customer, order, and shipment tables.
- Improved data quality by handling missing values, validating records, and correcting inconsistencies.
- Applied joins, CTEs, aggregate functions, subqueries, and CASE statements to analyze revenue trends, customer behavior, delivery performance, and return rates.
- Produced business insights that supported operational improvements and data-driven decision-making.

### **EDUCATION**

---

Bachelor of Arts (B.A.) in English — Lagos State University, 2024

### **CERTIFICATIONS**

---

- Microsoft Excel Course: Beginner to Expert — Udemy, December 2025
- SQL for Data Analytics and Business Analytics — Udemy, February 2025
